Friday, June 3, 2022 1:10 PM

Add ANDX to Trello (Bro Clements)

Career Prep: Tech Stack  
5-minute presentation  
1-hour worth work

Software Test Plan

Personal Dev Repo/Software Development Folder

Notes/Achievements

Risk Management:

Plan

Identify

Analyze

Plan responses

4 responses per risk

Monitor

Control

Opposite of Risks is opportunities

Risks for programming?

Stress, computer failure

Stop-light of risk threats

Red, Yellow, Green

Verification vs Validation

Testing

Audits

Testing

Test for each unit of program

The delivery of a product is more than coded executables

Workflows:

Waterfall

Spiral

agile

Definition of done

# Project/Team Development Plans

- How do you know if you are effectively doing your job?
  - We all want to be efficient?
- Plan help focuses us on what is needed.
  - They are not to waste time, but to provide guidance and efficiency.
- Two plans
  - Software Delivery Plan
    - 1-3 pages on how check in list.
  - Test Plan
    - 3-6 pages on what and how those features will be tested.
  - Risk Analysis
    - List of risks, analysis and potential mitigations.
  - VDD – Version Description Document
    - Both of these, help develop the VDD.
- Delivery of Product
